

Start Talking Science

Philadelphia 2016

Learn something **NEW** today! (for free!)

Meet local scientists and discuss their ground-breaking research!

- See inside protons using particle accelerators as "microscopes"!
- Learn how platelets and dense granules help blood to clot!
- Discover how the "tumor microenvironment" can help treat cancer!

But where and when is it?

Chemical Heritage Foundation
315 Chestnut St, Philadelphia, PA, 19106
Tuesday, September 27, 2016 from 6:00 - 8:00pm

Talking
Science
Philadelphia 2016

About Start Talking Science: Start Talking Science (STS) is a free public event where STEM (Science, Technology, Engineering, and Mathematics) researchers present non-technical posters to the community. We aim to increase the public awareness of – and interest in – cutting-edge, local research in order to make STEM more accessible. We hope to foster insightful conversations and connections while strengthening the communication skills of researchers. Visit StartTalkingScience.com for more info.
